

STUDENT POLICIES GOALS

The Board of Education believes the main purpose of the district is to provide a safe and orderly environment for learning and teaching free from disruption and with the opportunity for the peaceful expression and exploration of different points of view. Toward this end, it is necessary that an orderly atmosphere be maintained that will encourage the learning and teaching process while discouraging disruption.

The Board is dedicated to ensuring the district provides an atmosphere where students are treated with courtesy and consideration, are able to develop a positive self image, learn to accept responsibility for their future and are able to develop interpersonal relationships that enable them to be aware of their responsibility in the larger community.

The Board recognizes the worth of each student as an individual. The Board accepts the responsibility of helping each student to develop his/her capacity for intellectual, creative, physical, emotional, and social growth. The Board acknowledges that a student's growth is influenced by his/her environment and that life consists of a diversified succession of experiences. Therefore, the school attempts to create an environment in which the student may learn to live successfully in a rapidly changing world in order to become a responsible and productive member of society.

Adoption date: June 4, 2002

Effective: July 1, 2002
