

PLANS, SPECIFICATIONS AND COST ESTIMATES

The architect, engineer and/or site planner shall develop plans and specifications which comply in all respects with the laws of the State of New York and the regulations and requirements of the State Education Department and/or any other governmental agency with jurisdiction over the project.

Such plans shall be submitted to Board of Education for its consideration and approval. Following approval by the Board, the plans will be submitted to the appropriate state and local agencies for their review and approval, if required.

The architect and/or the engineer will develop site, construction, and equipment plans and specifications which comply in all respects with State Education Department requirements and/or those of any other governmental agency with jurisdiction over the project. Such plans shall be submitted to the Superintendent for review, who in turn will present them to the Board for its consideration and approval. Following approval by the Board, the plans will be submitted to the appropriate state and local agencies for their review and approval, if required. The architect shall submit a copy of all documents issued to or received from public agencies in connection with the project.

Estimates of construction costs will be prepared by the architect or engineer and submitted to the Superintendent. After review, the Superintendent will present them to the Board for consideration and approval. The final determination of cost and budget of any project is the sole responsibility of the Board. The total of this budget, when approved by the Board, shall be the determinant of the amount of money submitted to the people for approval.

The architect shall keep the Board informed as to the status of any building projects through monthly written and oral reports to the Board.

Adoption date: June 4, 2002

Effective: July 1, 2002
